The hotel has a fully functional business center paired with flat-screen computers, internet access and private boardrooms. The newly renovated lobby was inspired based on two main objectives; first, to transform the existing single dimension grand lobby into a multi-dimensional lifestyle-concept space that will enhance the guests' experience when dining and lounging in the lobby; and second, to improve traffic patterns, through the construction of larger check-in areas and through maximizing the Lobby's three entrances. Waterfront Cebu City Hotel and Casino's massive, high-ceilinged lobby has always been its principal attraction in fact it is touted as the largest hotel lobby in Visayas-Mindanao area. Spanning 22 meters wide, 96 meters in long and 35 meters high and crisscrossed by hundreds of people each day, the hotel's grand lobby sets the whizzing pulse for the hotel and dictates its overall ambiance.

Apart from improvements to the general structure of the lobby, the Lobby Lounge itself will offer an all-new dining and lounging experience, with newly-installed glass panels, semi-closing each side of the lounge. Fully-equipped bar areas have also been installed in the middle of each of the lounge's two sections, ensuring diners of more efficient and prompt service. To enhance the overall guest experience, the hotel has put together additional features such as nightly entertainment from the city's top performers, and soulful afternoon music by soloists. Among the hotel's newest pride comes in the form of delectable treats, introducing Lobby Lounge's new service concepts.

Guests can now relive the splendor and grace of the old English days with the Lobby Lounge's Afternoon Tea offering. It is a tea and dessert concept created to give guests a whole new tea experience by giving emphasis on unique ways to enjoy a cup of tea. Guests can expect an array of snack choices to complement their tea selection. The Afternoon Tea comes with a choice of Traditional Afternoon Tea with a Local Twist or Chocolate Temptations. For each selection, guests may opt for tea, coffee or hot chocolate. Each selection also comes with a variety of snack options to go along with their choice of beverage.

Guests can now take a sip of Lobby Lounge's extensive selection of wine. The wine dispenser is an innovative addition to the wining and dining experience at the hotel. It serves the purpose of allowing guests to select among an array of bottles, through tasting by the glass. This concept intends to give guests an opportunity to sample different wines in small amounts before deciding to order a full glass or bottle. Guests may test wines from the dispenser in three different amounts. This way, guests can choose the perfect wine fit for their palate. To enjoy the wine dispenser service, guests must avail of the Wine Card which comes in prepaid or postpaid.

To complement the Hotel's main lobby, a group check-in counter is constructed, dedicated solely to corporate and travel groups; and an additional Casino Filipino gaming space of 2,350 square meters is launched together with it. This will not only enhance the current lobby, but will also increase operational efficiency and add more exciting features for the hotel's customers.

Basis of Consolidation

The consolidated financial statements include the accounts of the Parent Company, as well as those of its subsidiaries enumerated in Note 1 to the consolidated financial statements.

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity if and only if, the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Company and are included in the consolidated financial statements from the date when control commences until the date when control ceases.

The accounting policies of subsidiaries are being aligned with the policies adopted by the Group. Losses applicable to the NCI in a subsidiary are allocated to the NCI even if doing so causes the NCI to have a deficit balance.

Segment Reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operating results are reviewed regularly by the Group's BOD, the chief operating decision maker of the Group, to make decisions about resources to be allocated to the segment and to assess its performance, and for which discrete financial information is available.

Segment results that are reported to the Group's BOD include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly corporate assets, head office expenses and income tax assets and liabilities. Segment capital expenditure is the total cost incurred during the year to acquire property and equipment.

The Group's businesses are operated and organized according to the nature of business provided, with each segment representing a strategic business unit, namely, the hotel operations, marketing operations and corporate and other operations segments. The Group's only reportable geographical segment is the Philippines.

Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Income is measured at the fair value of the consideration received, net of trade discounts, rebates, and other sales taxes or duties. The following specific criteria must also be met before revenue is recognized:

Rooms

Room revenue is recognized based on actual occupancy.

Food and Beverage

Food and beverage revenue are recognized when orders are served and billed.

Rent and Related income

Rent and related income on leased areas of the Group's properties is accounted for on a straight-line basis over the term of the lease, except for cancellable leases which are recognized at amount collected or collectible based on the contract provision.

Other Revenues

Other revenues are recognized upon execution of service or when earned.

SSS Loan

SSS vs WPI. Et al civil case no. Q-04-52629 at regional trial court, Quezon City. On October 28, 1999, the Parent Company obtained a five-year term loan from SSS amounting to P375.00 million originally due on October 29, 2004. The SSS loan bears interest at the prevailing market rate plus 3% or 14.5% per annum, whichever is higher. Interest is repriced annually and is payable semi-annually. Initial interest payments are due 180 days from the date of the release of the proceeds of the loan. The repayment of the principal shall be based on eight (8) semi-annual payments, after a one-year grace period.

The SSS loan was availed to finance the completion of the facilities of WCCCHI. It was secured by a first mortgage over parcels of land owned by WII and by the assignment of 200 million common shares of the Parent Company owned by TWGI. The common shares assigned were placed in escrow in the possession of an independent custodian mutually agreed upon by both parties.

On August 7, 2003, when the total loan obligation to SSS, including penalties and interest, amounted to P605.00 million, the Parent Company was considered in default with the payments of the loan obligations, thus, on the same date, SSS executed a foreclosure proceeding on the mortgaged parcels of land. The SSS's winning bid on the foreclosure sale amounting to P198.00 million was applied to penalties and interest amounting to P74.00 million and P124.00 million, respectively. In addition, the Parent Company accrued penalties charged by SSS amounting to P30.50 million covering the month of August until December 2003, and unpaid interest expense of P32.00 million.

The Parent Company, WII and TWGI were given the right to redeem the foreclosed property within one (1) year from October 17, 2003, the date of registration of the certificate of sale. The Parent Company recognized the proceeds of the foreclosure sale as its liability to WII and TWGI. The Parent Company, however, agreed with TWGI to offset this directly against its receivable from the latter. In August 2004, the redemption period for the Parent Company, WII and TWGI expired.

The remaining balance of the SSS loan is secured by the shares of stock of the Parent Company owned by TWGI and shares of stock of WII numbering 235 million and 80 million shares, respectively. The Parent Company, at various instances, initiated negotiations with the SSS for restructuring of the loan but was not able to conclude a formal restructuring agreement.

On January 13, 2015, the RTC of Quezon City issued a decision declaring null and void the contract of loan and the related mortgages entered into by the Parent Company with SSS on the ground that the officers and the SSS are not authorized to enter the subject loan agreement. In the decision, the RTC of Quezon City directed the Company to return to SSS the principal amount of loan amounting to P375.00 million and directed the SSS to return to the Company and to its related parties titles and documents held by SSS as collaterals.

Omnibus Security and Loan Agreement Covenants

As of December 31, 2024, the Group's debt service coverage ratio had fallen below the agreed threshold, but the Group was able to obtain a creditor waiver for the breach. The Group is not in default and continues to pay the maturing interest and principal in a timely manner.

c. There are no material off-balance sheet transactions, arrangements, obligations (including, contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

d. The group is not subject to externally-imposed capital requirements.

Financial Risk and Capital Management Objectives and Policies

The Group's principal financial instruments comprise of cash and cash equivalents, receivables, notes receivable, due from related parties, short-term investments, equity securities - at FVOCI, other noncurrent assets (excluding advances to contractors and advances to supplier), accounts payable and accrued expenses (excluding local taxes, output VAT and withholding taxes), loans payable, due to a related party, lease liabilities, other current liabilities (excluding deferred income), concessionaires' deposits and retention payables. These financial instruments arise directly from operations.

The main risks arising from the financial instruments of the Group are credit risk, liquidity risk and market risk. There has been no change to the Group's exposure to risks or the manner in which it manages and measures the risks in prior financial years. The Group's management reviews and approves policies for managing each of these risks and they are summarized as follows:

Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables.

The Group has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, if they are available, financial statements, credit agency information, industry information, and in some cases bank references. The Group limits its exposure to credit risk by establishing credit limits and maximum payment period for each customer, reviewing outstanding balances to minimize transactions with customers in industries experiencing particular economic volatility.

With respect to credit risk from other financial assets of the Group, which mainly comprise of due from related parties, the exposure of the Group to credit risk arises from the default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments.

There is no other significant concentration of credit risk in the Group.

The credit grades used by the Group in evaluating the credit quality of its receivables to customers and other parties are the following:

Grade A financial assets pertain to financial assets that are neither past due nor impaired which have good collection status. These financial assets are those which have high probability of collection, as evidenced by counterparties having ability to satisfy their obligations.

Grade B financial assets are those past due but not impaired financial assets and with fair collection status. These financial assets include those for which collections are probable due to the reputation and the financial ability to pay off the counterparty but have been outstanding for a length of time.

Grade C financial assets are those which have continuous default collection issues. These financial assets have counterparties that are most likely not capable of honoring their financial obligations

The credit quality of the Group's financial assets that are neither past due or impaired is considered to be of good quality and expected to be collectible without incurring any credit losses.

Information on the Group's receivables and due from related parties that are impaired as of December 31, 2024 and 2023 and the movement of the allowance used to record the impairment losses are disclosed in Notes 5 and 8 to the consolidated financial statements.

Liquidity Risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due.

The Group monitors and maintains a level of cash deemed adequate by the management to finance the Group's operation and mitigate the effects of fluctuations in cash flows. Additional short-term funding is obtained through related party advances and from bank loans, when necessary.

Ultimate responsibility for liquidity risk management rests with the BOD, which has established an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. For the Group's short-term funding, the Group's policy is to ensure that there are sufficient working capital inflows to match repayments of short-term debt.

Market Risk

Market risk is the risk that the fair value or cash flows of a financial instrument of the Group will fluctuate due to change in market prices. Market risk reflects interest rate risk, currency risk and other price risks.

The Group is primarily exposed to the financial risk of changes in equity prices of its equity securities - at FVOCI.

Interest Rate Risk

Cash flow interest rate risk is the risk that the future cash flow of the financial instruments will fluctuate because of the changes in market interest rates. Fair value interest rate risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market interest rates.

The Group's financial instrument that is primarily exposed to interest risk is the interest-bearing funds made available by the Parent Company to WCCCHI to finance the construction of the Cebu City Hotel Project. Such funds were substantially sourced from a P375.00 million loan from SSS, as well as the stock rights offering of the Parent Company. In 2006, the Parent Company charged WCCCHI on the related interests and penalties on the contention that the latter benefited from the proceeds of the SSS loan. Starting 2017, WCCCHI was not anymore charged with the interest on SSS loan because the Parent Company has assessed that if it has already fulfilled its obligations related to its use of proceeds from such loan.

Cash flow interest rate risk exposure is managed within parameters approved by management. If the exposure exceeds the parameters, the Group enters into hedging transactions.

Equity Price Risk

Equity price risk is the risk that fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Group monitors the changes in the price of the shares of stock of WPI. In managing its price risk, the Group disposes of existing or acquires additional shares based on the economic conditions.

Fair Value of Financial Assets and Liabilities

The carrying amount of cash and cash equivalents, receivables, current portion of due from related parties, accounts payable and accrued expenses and other current liabilities approximate their fair values due to the short-term maturity of these instruments.

The fair value of interest-bearing due from related parties and loans payable is based on the discounted value of expected future cash flows using the applicable market rates for similar types of instruments as of the reporting date; thus, the carrying amount approximates fair value.

Risk Management Structure

Board of Directors

The BOD is mainly responsible for the overall risk management approach and for the approval of risk strategies and principles of the Group. It also has the overall responsibility for the development of risk strategies, principles, frameworks, policies and limits. It establishes a forum of discussion of the Group's approach to risk issues in order to make relevant decisions.

Risk Management Committee

Risk management committee is responsible for the comprehensive monitoring, evaluating and analyzing of the Group's risks in line with the policies and limits set by the BOD.

Capital Management

The primary objective of the Group's capital management is to ensure its ability to continue as a going concern and that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholder value. Capital is defined as the invested money or invested purchasing power, the net assets or equity of the entity. The Group's overall strategy remains unchanged from 2025 and 2024.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. For purposes of the Group's capital management, capital includes all equity items that are presented in the consolidated statement of changes in equity, except for revaluation surplus on property and equipment, retirement benefits reserve, foreign currency translation adjustment and fair value reserve.

The Group's capital management, among other things, aims to ensure that it meets financial covenants attached to the omnibus and security loan agreement. Breaches in meeting the financial covenants would permit the bank to immediately call the loans.
